Behlen COUNTRY

Horseman's Choice Horse Stalls for

Set-up of stall is simple and quick. Portable, free-standing stalls can easily be set up in various row configurations with easy-to-use connectors. Wall brackets are available if stalls are to be attached to a current wall. Lower 4' of stall is to be filled with 2" customer-supplied lumber.

Heavy gauge 2" round tube framing is used for extra strength and stability, and 1/2" solid vertical rods spaced 3" apart allow for better ventilation and viewing of the horse than competitors' vertical tube dividers. No sharp edges to injure animals. Each stall front comes with a 4' sliding door and 2' feeder door. Feeder door swings out easily and is low enough to allow even a child to use. Sliding door has rollers on top which allow the door to glide easily with minimal effort. Optional Corner Feeders (#15574 and #15575) can be attached to allow horse to be fed from outside the stall.

Finished with Behlen's Diamond Kote paint—a high solids, baked-on polyester enamel. This finish is harder, smoother, glossier and more chip-resistant, corrosion-resistant, and fade-resistant than conventional paints. Available in gray or in galvanized finish.
