Horse Facts

The Tennessee walking horse originated from the Narragansett Pacer and the Canadian Pacer. In the early 1800s, these two breeds were blended by Tennessee breeders who were looking for a horse that could handle the mountainous terrain of the area. Confederate Pacer and Union Trotter blood was added during the Civil War, creating the sturdy Southern Plantation Horse (aka the Tennessee Pacer). Breeders later added Thoroughbred, Standardbred, Morgan, and American Saddlebred blood to refine and add stamina to their gaited horse.

In 1885, Black Allen was born. By the stallion Allendorf (from the Hambletonian family of trotters) and out of a Morgan mare named Maggie Marshall, he became the foundation sire of the Tennessee walking horse breed.

The registry was formed in 1935. The stud book was closed in 1947, so every walker after that date has to have both parents registered to qualify for registration.

The town of Shelbyville, Tenn. considers itself to be the "Walking Horse Capital of the World."

Curb chain hook. Pair. 155140 **\$.59** pair

FOR YOUR INFORMATION:

BIT TERMS

PURCHASE - the part of the bit above the mouthpiece. This affects both the timing and the leverage of the bit.

CHEEKS - sides of the bit. Includes both purchase and shank.

SHANK - the part of the bit below the mouthpiece. Will give you leverage on the mouthpiece. The shorter the shank, the less control - the longer the shank, the more control.

METAL USED IN MOUTHPIECES

COPPER - causes a horse's mouth to salivate which allows the mouth to stay soft and usable to the rider.

SWEET IRON - intended to rust. It has a sweet taste to enhance salivation.

STAINLESS STEEL - has very little taste and creates the least salivation. Has a clean, neat look.

Saddle Bags/Misc.

Powder River Saddle Rack

The Powder River Saddle Rack is ideal for storing and displaying saddles. The powder-coated finish ensures durability and a smooth surface for the saddles. To save space in your tack room, combine Rack Add Sections to the sturdy (one rack) base. Each Rack Add Section swivels for easy saddle access and allows ample spacing between saddles for good air circulation.

21221 add section **\$41.99**

21220 base **\$74.99**

Picture shown is 2 each of 21221 and 1 of 21220

Saddle Rack

Folding style saddle rack.

Horse Stalls for**

Setup of stall is simple and quick. Portable, free-standing stalls can easily be set up in various row configurations with easy-to-use connectors. Wall brackets are available if stalls are to be attached to a current wall. Lower 4' of stall is to be filled with 2" customer-supplied lumber.

Heavy gauge 2" round tube framing is used for extra strength and stability, and 1/2" solid vertical rods spaced 3" apart allow for better ventilation and viewing of the horse than competitors vertical tube dividers. No sharp edges to injure animals. Each stall front comes with a 4' sliding door and 2' feeder door. Feeder door swings out easily and is low enough to allow even a child to use. Sliding door has rollers on top which allow the door to glide easily with minimal effort. Optional Corner Feeders (#15574 and #15575) can be attached to allow horse to be fed from outside the stall.

Finished with Behlen's Diamond Kote paint — a high solids, baked-on- polyester enamel. This finish is harder, smoother, glossier and more chip-resistant, corrosion-resistant, and fade-resistant than conventional paints. Available in gray only, or ingalvanized finish .
