You know that proper nutrition plays an important role in your overall health and well-being and the same goes for your pet. Understanding the complexities of nutrition goes well beyond merely reading a list of ingredients.

Would you feed a baby steak? Or eat salty potato chips if you had high blood pressure? Of course not. And just like people, every pet has special nutritional needs. For example, a pet food formulated to meet the requirements of a growing puppy would not be appropriate for an older dog whose heart is stressed from age.

From puppy lovin' to growing old together, Hill's helps you make the best of man's best friend. Learn more about keeping the quality of your pet's life in tip-top shape.
